

# Grants Pass Clinic Newsletter

Fall 2018

Flu season has arrived! Take a simple step to protect yourself and those close to you from the flu by getting vaccinated.

## Adult Flu Shot Clinic

Sept. 17—Oct. 26

Monday—Friday

9 AM—12:30 PM and 2—4:30 PM

## Pediatric Flu Shots

Call our Pediatric Dept. starting October 2 for information.

## Welcome to our Lab!

As a Grants Pass Clinic patient you have access to a wide variety of lab services located in the very same building as your primary care provider's office! In addition to any labs your primary care provider may order, our lab can satisfy orders from your specialists and providers outside of the clinic. We make sure to get your lab results to everyone who needs them.

The next time you need lab work done, come visit our lab located on the first floor of the clinic!

## Our Lab Services

- Blood draws
- Urine collection
- EKG Tests
- Orders from specialists and other providers

Talk with your provider about what tests are best for you or your child as well as any medical conditions you may have.

## Here are some important tests your provider may recommend:

- **FIT test**— for people ages 50-75, this is a take home kit that screens for colorectal cancer.
- **A1c**—a blood test that measures your blood sugar. This test is especially important if you have diabetes or diabetic concerns.
- **Urine tests**—depending on your age and other medical conditions a urine sample can show lots of things. If you are diabetic your provider may order a urine test that helps show kidney function.

# New Primary Care Providers

Accepting new patients!

*Cady L. Knight, FNP-C
