## **Physical Exams & Annual Wellness Visits**

A “Physical Exam” or “Annual Wellness Visit” is focused on preventive services. Services provided at these types of visits include updating health information, screening tests, vaccinations and discussion of preventive health care. Many insurance companies no longer require a co-pay or payment towards your deductible for this type of visit.

**It is important for you to know that if you have an existing chronic health condition (high blood pressure, high cholesterol, diabetes, and many other conditions), new health concern, illness, or acute injury additional time and attention for evaluation, monitoring, and management of this condition may be needed. These services may require a co-pay and are subject to your deductible even if they are provided the same day as your preventative visit.**

As a convenience to you, if you are scheduled for a physical or wellness visit, we are usually able to offer both services at this appointment. Combining your concerns prevents you from having to schedule two different appointments. Please be aware by combining both visit types; you may be required to pay your deductible or co-pay. If you prefer, we can schedule a separate appointment for you to discuss the additional concerns with your provider.

If you have any questions about this, please talk to someone from your patient care team or give us a call 541-476-6644.
